

DIRECTOR OF CENTRAL INTELLIGENCE  
Intelligence Information Handling Committee  
WASHINGTON, DC 20505

IHC/MM 87-109  
3 April 1987

IT/TRIS  
LOGGED

MEMORANDUM FOR: Mr. Edward J. Maloney  
D/OIT/CIA

SUBJECT: IHC Annual Conference

STAT 1. The DCI Intelligence Information Handling Committee will hold its annual offsite conference [redacted] on 19-21 April 1987. The conference will focus on a number of key Intelligence Community information handling issues and programs, serving as a forum for discussion of participating agency views, requirements, and recommendations. Conference findings will guide subsequent IHC actions in the areas addressed and provide, where appropriate, the basis of recommendations to the DCI, DDCI, and D/ICS. The informal conference environment, away from the demands of office schedules, permits in-depth consideration of complex and often controversial questions of Community information handling policy, design, and procedure.

2. The Committee makes it a practice to invite to particular conference sessions additional members of the Intelligence Community and other Government agencies whose experience, expertise, and professional responsibilities are relevant to the subjects under consideration. Their participation in conference proceedings is unrestricted, and they are encouraged to contribute to the discussion and exchange of information. In this regard, the Committee would be pleased if you could attend the conference on 21 April 1987 when the major agenda items will be the Open Source Information Exchange and the prospective revision of DCID 1/16.

STAT 3. Please advise [redacted] by 10 April whether you will be able to attend the conference. Air transportation between National Airport and the conference site will be provided, departing Washington at 0800 and returning about 1430 and 1700. Luncheon will be served at the conference.
